**Subject:** still can't get it to work

So I changed the field size(image path) in the template and the project file to 250 in both the samples table and the water samples edd file. It's still cutting things off. Can you see what I'm doing wrong? I attached the backup file, the import map, the template and the csv file. Feel free to give me a call or tell me to bother someone else if your busy with Libby.
